PROFESSIONAL SUMMARY

Detail-oriented and enthusiastic Computer Science graduate with strong knowledge in Java, SQL, Manual Testing, and Automation Testing (Selenium WebDriver). Skilled in test case design, defect tracking, and web automation. Strong understanding of SDLC, STLC, and Agile methodology. Seeking an entry-level Software Testing position to contribute to quality-driven development.

TECHNICAL SKILLS

- Programming: Core Java, OOPS Concepts
- Database: SQL (Basic Queries, Joins)
- Automation Testing: Selenium WebDriver, XPath, CSS Selectors, Select & Actions Class, Waits
- Manual Testing: SDLC, STLC, Functional, Integration & System Testing
- Tools & Concepts: Test Case Design, Defect Reporting, Agile Methodology

PROJECTS

Password Manager: Developed a mobile application to securely store and manage user passwords for various online platforms with enhanced security measures.

Garbage Management System: Developed a smart waste management system using ultrasonic sensors to detect garbage levels and transmit real-time data with location tracking to authorized workers.

EDUCATION

- B.E – Computer Science and Engineering (2021–2025) | M. Kumarasamy College of Engineering | CGPA: 6.5
- Diploma (2022) | Thiagarajar Polytechnic College | 86%
- SSLC (2019) | National Matriculation School | 86%

CERTIFICATIONS

- Completed NPTEL Course: Introduction to Internet of Things (2024)
- Completed Software Testing Course (Manual & Automation Testing)

SOFT SKILLS

- Adaptability
- Team Work
- Problem Solving
- Quick Learning Ability
